Research and Development
Research and Development are one of your company’s core processes. In order to succeed in international competition, your product must be in top of the line. Product development and related research activities are long-span projects, whose goal is to answer the market needs and to ensure that the product meet its regulatory requirements.

With well-managed chain of subcontractors you ensure the high-class outcome by costefficient manufacturing and flawless supply chain for your product. By investing in these processes you ensure the competitiveness of your product in international markets.

With efficient project management you make sure that in the R&D projects right tasks are performed in agreed schedule and budget.

The cornerstones of Kasve’s success

- Professional project management
- Vast experience of working with subcontractors
- Excessive networks of best CROs, and CMOs around the globe
- We know the lifespan of a healthcare innovation from an idea to the marketed product, and beyond
Kasve Research and Development services include:

Working in close collaboration with you and our global business networks we are ready to be your outsourced Project Manager and take expert care of your R&D projects, as if they were our own.

**PROJECT PLANNING, BUDGET AND SCHEDULING**
We compile a detailed project plan for your R&D project, including the budget and detailed list of duties. You get experienced project manager, who professionally and reliably coordinates the R&D project, exactly the way you want.

If you wish, we are more than happy to help you also with the project funding opportunities.

**TENDERING AND COORDINATION OF SUBCONTRACTORS**
By utilizing our extensive CRO/CDMO networks, we find and evaluate the best partners for you, whether you are looking for a subcontractor for a biocompatibility studies, pharmaceutical formulation development, product design or contract manufacturing.

**OUTSOURCED PROJECT MANAGER**
The duties of Kasve Project Manager are agreed separately based on your specific needs, and may include e.g. the following:
- The design and execution of studies together with the subcontractors
- Project management and coordination
- Contract negotiation (R&D, Manufacturing, and Quality)
- Project quality control and risk management

We make sure that in your R&D project the right tasks are performed at the right time and that the regulatory characteristics of each territory are taken into account.
